Implementation Planning Process

Prior to implementing any strategy, a "gold standard" for implementation should be established. Begin the process by completing this [Instructional Practices Unpacking Tool](#); once the strategies in your SIP have been identified and expanded, complete an [Instructional Practices Management Tool](#) for each. The process should then culminate in the completion of an [Implementation Guide](#) detailing the gold standard, acceptable, and unacceptable variations for each strategy. These documents together will provide ample details for the completion of the [School Improvement One-pager](#).
